

## Premier ICC Developer and Advanced User Conference

### CALL FOR STUDENT POSTERS

ICC DevCon is designed for those involved in or investigating the implementation of ICC based color management in their product or software. DevCon events feature sessions by top-level experts, presenting topics such as multi-ink proofing & spectral methods using ICC profiles, metameric issues within CM, management of the UV measurements, and a BizCon track that will address ICC benefits and business case for color management and ICC profiles.

ICC invites submissions from students of color and imaging science for the Interactive Poster Session to be held during DevCon 2010. Posters on any aspect of color management are welcome.

Abstracts should be approximately 500 words, clearly summarizing the technical content of the paper. The format for abstracts is:

- Paper title
- Author name(s), affiliation(s), postal address, and email contact for principal author.
- 500-word abstract
- 50-word biographical sketch of the principal author.

Accepted posters will be published by ICC with the presentations from the oral sessions. Students' registration fee for attending all the DevCon sessions will be waived.

Abstracts with bios should be sent to Veronika Lovell at [veronika.lovell@sunchemical.com](mailto:veronika.lovell@sunchemical.com) by April 1, 2010.

Held in conjunction with IS&T/SID 18th Color Imaging Conference at  
Sheraton Gunter Hotel, 205 E. Houston Street, San Antonio, TX 78205
